CLINICAL STUDY PROTOCOL

LUMINA-NB2: A Phase II, Open-Label, Single-Arm Study of BPC-118 in Combination with Temozolomide in Children and Young People with Relapsed or Refractory High-Risk Neuroblastoma

Protocol number: BPC-118-NB2
Version and date: 1.2, 4 May 2026
IRAS ID: 1012446
Phase: Phase II
Sponsor: Brightpath Children's Cancer Research, Brightpath House, 3 Temple Quay Court, Bristol BS1 6EZ (registered charity no. 1199999 - fictional)
Chief Investigator: Dr Clara Whitfield

1. Synopsis

Population: children and young people aged 1 to 17 years with relapsed or refractory high-risk neuroblastoma after at least one line of salvage therapy. Approximately 36 participants will be enrolled at three UK Principal Treatment Centres.

Design: open-label, single-arm, Simon two-stage. Participants receive BPC-118 (an anti-GD2 chimeric monoclonal antibody) as a continuous infusion on Days 1 to 5 together with oral temozolomide on Days 1 to 5 of each 21-day cycle, for up to six cycles.

Primary endpoint: best overall response by the end of cycle 6 (INRC 2017). Secondary endpoints: progression-free survival, overall survival, safety, pain scores and quality of life (PedsQL).

2. Eligibility (summary)

- Age 12 months to 17 years at consent.
- Lansky or Karnofsky performance score of 50 or more.
- Adequate bone marrow, renal and hepatic function.
- Written informed consent from a parent or guardian, and assent from the child where appropriate.
- Exclusion: prior anti-GD2 therapy within 12 weeks; uncontrolled infection; pregnancy.

3. Schedule of visits

Visits must take place within the windows below. Visits outside the window are recorded as protocol deviations.

Visit code	Visit	Timing	Window
SCR	Screening	Day -21 to Day -1	-
C1D1	Cycle 1 Day 1-5 (inpatient admission)	Day 1	-
C1D8	Cycle 1 Day 8 (outpatient bloods)	Day 8	+/- 1 day
C1D15	Cycle 1 Day 15 (outpatient bloods)	Day 15	+/- 2 days
CnD1	Cycles 2-6 Day 1-5 (inpatient admission)	Every 21 days	+/- 3 days
DA	Disease assessment (MIBG / CT) after cycles 2, 4 and 6	Day 15-21 of cycle	+/- 3 days
EOT	End of Treatment	30 days after last dose	+/- 7 days
FU	Follow-up every 3 months for 2 years	Every 13 weeks	+/- 14 days

Each treatment cycle includes a five-day inpatient admission (Days 1 to 5) for the BPC-118 infusion, with outpatient blood tests on Days 8 and 15. A parent or guardian is expected to stay with the child during admissions.

4. Safety reporting

Serious adverse events are reported to the sponsor within 24 hours of the site becoming aware. SUSARs

are reported to the MHRA and the REC in line with UK regulations.

5. Support for families: travel and expenses

Families will not be out of pocket because of taking part. The sponsor's Family Travel and Expenses Policy applies at all sites; the clinical trial agreement with each site may adjust local rates. Claims are submitted through the CareCompanion app within 90 days and paid within 21 days.

- Travel by car: £0.45 per mile for the child and up to two parents or guardians travelling together. Journeys over 200 miles return must be agreed with the site in advance. No receipt required.
- Public transport: actual cost of standard-class fares for the child and up to two parents or guardians, ticket or receipt required.
- Taxi: only where agreed in advance by the site, up to £80.00 per journey, receipt required.
- Car parking: actual cost up to £10.00 per day, receipt required.
- Parent meals during inpatient admissions: up to £15.00 per day per family, receipts required.
- Accommodation for parents during inpatient admissions: free on-site family accommodation where available; otherwise a hotel up to £95.00 per night, approved in advance, receipt required.
- Childcare for brothers and sisters on admission days: up to £50.00 per day, receipt from the childcare provider required.
- Thank-you voucher: a £20.00 gift voucher for the child for each completed treatment cycle. This is a thank-you, not a payment for taking part.
- Loss of earnings is not reimbursed.

6. Ethics and regulatory

The study will be conducted in accordance with ICH GCP (E6), the UK Policy Framework for Health and Social Care Research and the Medicines for Human Use (Clinical Trials) Regulations 2004. Favourable opinion from the Severn Vale Research Ethics Committee and HRA Approval are required before any site opens.
